NEWS RELEASE

Customer Advisory – Temporary Disruption at Site-2 Due to Heavy Rainfall

Mumbai (6th July 2026)

Dear Valued Customer,

Due to heavy rainfall in Maharashtra over the past few days, waterlogging at and around our **Site-2 in Mahad** has temporarily impacted production and plant operations. In addition, restrictions on vehicle movement on certain roads are affecting the transportation of raw materials and finished goods.

We have implemented proactive preventive measures to ensure the safety of our personnel and operations. Operations at Site-1 and Site-4 continue as normal. Site-3 also remains operational, except for Ethyl Acetate, where a Force Majeure remains in effect.

As a result, production, dispatches, and deliveries of Acetic Anhydride (AAH) and Specialities BU products manufactured at Site-2 may be disrupted over the next few days.

Our site teams are closely monitoring the situation and are taking all necessary steps to restore normal operations at the earliest. We will continue to keep you informed of any further developments in due course.

We appreciate your understanding and continued support. For any assistance, please contact your respective sales representative.
