**NEWS RELEASE****Mumbai, 17<sup>th</sup> July 2026****Dear Valued Customer,**

Since our communication dated 15th July, the geopolitical tensions in West Asia have continued, while disruptions in the global shipping industry persist. Further, Typhoon Bavi has caused logistical disruptions in the China and Taiwan region, adversely impacting the movement of imported raw materials, including Acetic Acid. The supply situation for imported raw materials has deteriorated further.

Acetic Acid prices have further increased from approximately ₹56/kg to around ₹62/kg (ex-Indian ports) within the last 24 hours, creating a huge cost escalation suddenly.

To absorb the cost escalation and maintaining supplies, we are announcing price increase with immediate effect.

| Product          | Increase (₹/kg) | Revised Listed Price (₹/kg) |
|------------------|-----------------|-----------------------------|
| Ethyle Acetate   | 3.00            | 89.50                       |
| Acetic Anhydride | 6.50            | 98.50                       |

We remain committed to supporting our customers to the maximum extent possible under the prevailing circumstances and appreciate your continued understanding and cooperation.

For any clarification, please contact your respective Relationship Manager or Sales Manager.
