### NEWS RELEASE

**Mumbai, 21<sup>st</sup> September 2026**

**Dear Valued Customer,**

The prices of key imported raw materials, including Acetic Acid, n-Butanol, n-Propanol, and Ethanol, continue to rise sharply, compounded by escalating energy costs. Simultaneously, persistent supply disruptions and logistical constraints have further aggravated raw material availability and connectivity to production.

Consequently, we revise our prices with immediate effect, as detailed below:

| Product          | Revised Price* |
|------------------|----------------|
| Ethyl Acetate    | ₹124/kg        |
| Acetic Anhydride | ₹125/kg        |
| n-Butyl Acetate  | ₹142/kg        |
| n-Propyl Acetate | ₹149/kg        |

*\*Revised prices are applicable against immediate payment terms*

Given the prevailing supply constraints and limited availability of key raw materials, **our products will continue to be supplied on an allocation basis.**

We remain focused on supporting your requirements by maintaining continuity of supply despite the highly inflationary and challenging operating environment.

We appreciate your understanding and cooperation in these exceptional circumstances.
