NEWS RELEASE**Mumbai, 15th July 2026****Dear Valued Customer,**

The recent resumption of geopolitical conflicts in West Asia, following a brief period of ceasefire, has led to significant volatility in global energy and feedstock markets. Consequently, energy and feedstock prices have increased sharply. Additionally, ocean freights have risen, vessel availability for imports has tightened, and the Indian Rupee has depreciated against the US Dollar.

At the same time, the availability of key raw materials in India, which are imported, remains severely constrained. Acetic Acid prices have increased significantly from approximately ₹42/kg to ₹56/kg (ex-Indian ports) within a month, while other critical raw materials have also witnessed substantial price increases.

Further, as communicated earlier, the suspension of industrial water supply by MIDC has resulted in a Force Majeure event for Ethyl Acetate at our Lote site, impacting production and limiting the availability of finished goods.

While our priority continues to be maintaining supplies to our regular customers to the extent possible, the sudden increase in input costs and ongoing supply constraints have necessitated a revision in product prices. Accordingly, we are implementing the following price increase on all new order bookings with immediate effect:

Product	Increase (₹/kg)	Listed Price (₹/kg)
Ethyle Acetate	6.50	86.50
n-Propyl Acetate	25.00	145.00
n-Butyl Acetate	15.00	115.00
Acetic Anhydride	11.50	92.00

Customers are advised to plan their requirements in advance to ensure continuity of supply.

For any clarification, please contact your respective Relationship Manager or Sales Manager.
