NEWS RELEASE

Laxmi Organic Industries Ltd announces price revision for Essentials Products

Mumbai (23rd June 2026)

Dear Valued Customer,

Acetic acid supply continues to remain tight, with inventories in China and India declining following recent plant curtailments. Consequently, acetic acid offers have increased by over USD 50/MT and are seeing an uptrend.

Further, MIDC has notified an immediate suspension of industrial water supply to the Lote MIDC region due to critically low water levels in the Koyna Dam. This has resulted in a forced shutdown of our Lote plant, impacting Ethyl Acetate production.

In view of the sharp increase in raw material costs and ongoing supply constraints, we are implementing the following price increase on all new order bookings with immediate effect:

Product	Increase (₹/kg)
Ethyl Acetate	+3.00
Acetic Anhydride	+5.00

Customers are advised to plan their requirements in advance to ensure continuity of supply.

For any clarification, please contact your respective Relationship Manager or Sales Manager.
