NEWS RELEASE

Laxmi Organic Industries Ltd announces price revision for Essentials Products

Mumbai (10th Oct 2025) – Ethanol prices have increased significantly by ~ USD 100/MT, reaching around USD 790/MT, owing to supply shortages arising from extended maintenance activities and improved demand. Meanwhile, Acetic Acid prices have remained flat at lower levels.

Furthermore, INR has depreciated by ₹1 against **USD** over the past month.

All key raw materials and utilities (coal) used for manufacturing our products are imported, and hence, these developments in raw material prices and currency movement have resulted in a substantial escalation in the cost of our finished products.

In light of these dynamics, we hereby announce a revision in the selling prices for the following products under the **Essentials Business**, effective immediately:

Product	Change in Price (Rs. /kg)
Ethyl Acetate	+2.00
Acetaldehyde	+10.00
Acetic Anhydride	-
n-Propyl Acetate	+1.00
n-Butyl Acetate	-

Note: For supplies in Drums (HDPE, MS) / IBCs, incremental prices shall be applicable.
